

At Home.
A few cases of small pox have appeared in Southern Utah.
Gen. Cowan and his Indian delegation have reached Washington.

The New York Senate has adjourned until November 20th, not 10th as erroneously reported.
The efforts of the coal oil men to decrease production have failed.

Maurice Daly won \$2,000 billiard match in New York over John Deery of Chicago, Daly scoring 600 to Deery's 406 in 96 innings each.

The Cincinnati Exposition draws 10,000 visitors per day.
White, Brown & Co., Boston dry goods importers, are sued by the United States for defrauding the custom house of \$100,000.

Fifteen thousand eight hundred and eighty pounds of crude bullion from the Stockton mines, and a ton of pure silver bullion from the Pioche mines, at Salt Lake, were received last week.

Failures in Baltimore and New York within the last three days will aggregate between seven and four million dollars. The suspended firms are principally engaged in the wholesale grocery business.

Dr. Schaepe, recently acquitted at Carlsbad, Pa., of the murder of Miss Steinhilber, has filed a caveat to the will of deceased. The Doctor lays claim to Miss Steinhilber's estate under said will, which was admitted to probate early in 1893.

One of the men summoned for a jury in the Fair trial, pending in San Francisco, stated to the Court that he had been approached by a person who offered him a \$1,000, if he would secure a place on the jury and vote for the acquittal of the accused. The accused party is under arrest to answer to the charge of contempt.

The Texas cattle fever is prevailing to a considerable extent in McLean county, Illinois. Forty milch cows have died from the disease in Lexington within two weeks. Many more are sick. Every case has proved fatal, the animals living from two to six days.

Justice Henry Hogeboom, of the New Jersey State Supreme Court, and an eminent jurist, died at Hudson, N. J., aged sixty-four.

In East Cambridge, Mass., during a quarrel between James Cavanaugh and his sister, Bridget Talbot, he beat the latter so brutally that she died during the night.

Disputes from Victoria report matters in Alaska in a very unsatisfactory condition. The only place where there is anything like government in Alaska is in the immediate vicinity of Sitka. Outside, life and property are at the mercy of the Indians.

A New York dispatch says: Col Whitley received a statement to the discovery of an unusually large counterfeiting plot in St. Louis, the principals in which could not well be apprehended, and that the plot would be sent North to be finished. The counterfeiting material was seized at the office of Western Express Company in Brooklyn. It was packed in a box and addressed to B. Still, who had been afraid to take it from the office. Two plates of fifty-dollar bank-notes were found, together with about \$20,000 worth of counterfeit notes, which were pronounced the first of the kind ever issued.

The Sundown railroad air-line from New York to Cincinnati, which was projected several years ago, is now being built rapidly. A large force is now at work grading the road from Ohio, Ohio, to Fort Wayne. The grading from Rochester to Reusseler, Indiana, is also under contract, and work has been commenced. It is expected that the road will be completed from Rochester to Reusseler about the 1st of January. When completed this will be the shortest route between New York and Omaha.

The War Department has received a dispatch from Gen. Sherman, dated Duluth, Minn., September 8, saying that Col. Baker, after reaching the mountains of the Yellowstone Valley, was obliged to come back, on account of the surveying engineers deciding to go no further for fear of Indians, and therefore the expedition was a failure.

The President has issued a proclamation abolishing all duties on imports from Japan in Japanese vessels. The rule to hold good so long as Japan imposes no duties on imports from the United States.

Abroad.
Pope Pius IX. has finally abandoned all idea of leaving home.
A Geneva special says: "The Arbitrators are not all of the same opinion on several points, and will deliver papers expressive of their individual views. Full details of the proceedings will not be made public for some time yet."

The widow of Balta, the lately assassinated President of Peru, sailed from Aspinwall for New York on the 5th inst.

Prince Albrecht, commander in chief of the Austrian army, is dead.

Late Madrid dispatches complain that the Callists are again becoming troublesome. From the frontier the frontier have occurred. Troops have been dispatched to the menacing points, and precautions have been taken to prevent the insurgents from crossing over from France or concentrating in any considerable numbers.

A Brussels dispatch says a coal pit near Brussels, on the Menne, was accidentally flooded while the men were at work. The inundation was so sudden that twenty-five miners were drowned in the pit.

The French Radicals are determined, notwithstanding President Thiers' proclamation to the contrary, to celebrate the anniversary of the First Republic, in Paris and the provinces.

A hurricane visited the Windward Islands. Vessels are ashore at Saint Kitts, Guadeloupe, and Martinique and great damage has been done at Dominica. Vessels were dashed to pieces and wharves broken, and many lives lost. On the 10th a severe storm passed over Valparaiso, doing much damage to shipping.

A Paris letter says it is generally conceded on all sides that Thiers' death would result in civil war in France; that no little disquiet is caused by the chances of the occurrence of such a contingency.

Dispatches from Rome states that Cardinal Antonetti, the papal legate for the Emperor's in conference agreed to request the Pope to break from the Jesuits, the Emperor promising to interfere with Italy in behalf of the foreign religious corporations at Rome.

Edmund About, the popular French writer, has been arrested at Strasbourg by the Germans. It is presumed that Edmund's pen has wrought the mischief.

THE LITTON

ESTABLISHED 1859. HICKMAN, FULTON CO., KENTUCKY, SATURDAY, SEPTEMBER 21, 1872. VOL. VIII. NO. 37.

THE MISTAKE MAKER.

"This is dull enough," said a little fellow, "with the fragrance of June in her breath; 'twas in the month of June that I met her. I'm just about to die!"

"Dear me," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"I must have a 'blow-out' or die!" said the fellow, with a determined air.

"Dear me!" said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

who lived in the great splendid house near them, had some little homely, dull-bell flowers in her garden; but she thought everything of them because the seed was imported from Europe.

"After doing full justice to dandelions, I took the bouquet, and put it into a tumbler on my desk.

"You pay my dandelions a great deal of attention," said Patty, in a certain quaint way, peculiar to herself; and of course, I assured her—and most truthfully, too—that both she and the dandelions deserved all possible honor. Then, forgetting that I was a tired school-master, I offered her a chair, with all the gallantry of a gallant young gentleman; begged her to be seated, and that we might have a pleasant chat before the school-bell sounded. She sat down timidly, and a certain fear of me held her in restraint at first; but, in answer to many friendly inquiries, she began to relax herself, and I had never to think of death.

"I can't raise the wind in this poky old place," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"I must have a 'blow-out' or die!" said the fellow, with a determined air.

"Dear me!" said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

"You'd better get north-east by north," said the fellow, with a determined air.

"And I'll be there in a twinkling," said the breeze, with a delicious sigh, "so my quarters I'll change, if it brings me disease."

Words derive their power, not from their number, but from the directness and intensity with which they are delivered. Max Muller says: "A well educated person in England, who has read the public school and at the University, who reads the Bible, Shakespeare, the London Times, and all of Maudie's library, (60,000 volumes) of all the books published in England, seldom uses more than three thousand or four thousand words in actual conversation. Acute thinkers and close reasoners, who avoid words and general expressions, and would tell their meaning, employ a larger stock, and eloquent speakers, may rise to a command of 100,000 words. Most workers stand at about eight thousand, and the best of them at 10,000. The average man, with five thousand words, is a good talker, and a good worker."

Words derive their power, not from their number, but from the directness and intensity with which they are delivered. Max Muller says: "A well educated person in England, who has read the public school and at the University, who reads the Bible, Shakespeare, the London Times, and all of Maudie's library, (60,000 volumes) of all the books published in England, seldom uses more than three thousand or four thousand words in actual conversation. Acute thinkers and close reasoners, who avoid words and general expressions, and would tell their meaning, employ a larger stock, and eloquent speakers, may rise to a command of 100,000 words. Most workers stand at about eight thousand, and the best of them at 10,000. The average man, with five thousand words, is a good talker, and a good worker."
